EDUCATION

University of Colorado, Boulder

Boulder, CO

Master of Science: Computer Science (GPA 4.0 / 4.0)

June 2024 - June 2026

- **Computer Science Coursework:** Machine Learning, Deep Learning, Advanced Data Structure RSA and Quantum Algorithms.
- **Mathematics Coursework:** Statistical Methods for Data Science, Linear Algebra, Mathematics for Machine Learning.

University of California, Irvine

Irvine, CA

Bachelor of Arts: Business Economics

September 2019 - December 2022

WORK EXPERIENCE

Kashmir World Foundation

Richmond, VA

Artificial Intelligence / Machine Learning Researcher

September 2024 - Present

- **Researched and developed AI/ML project plans**, conducting literature reviews and model assessments to identify optimal algorithms and datasets, which accelerated project timeline by 20% and improved model accuracy by 7% compared to baseline approaches.
- **Built and deployed scalable machine learning models** on AWS and GCP multi-GPU environments, utilizing data engineering and distributed computing to reduce model processing time by 30% and increase real-time analytics capacity, enabling the team to meet high-volume data requirements.
- **Facilitated cross-functional collaboration for AI initiatives** from concept to production, coordinating with data scientists and engineers using Agile methodologies, and implementing CI/CD pipelines and version control. These actions reduced deployment times by 25% and ensure 100% compliance with industry standards.

True Path Financial

Irvine, CA

Associate Data Analyst

February 2023 to April 2024

- **Engineered and maintained data pipelines** to process and analyze **1TB+ of unstructured financial data**, utilizing **Python** and advanced anomaly detection models (e.g., Isolation Forest, One-Class SVM). This work provided critical insights that directly contributed to an **11.3% increase in client portfolio ROI**.
- **Designed data visualizations** with **Seaborn** and **Matplotlib** to communicate complex financial trends, improving stakeholder decision-making and team collaboration by translating data into actionable insights.
- **Led the development of a data governance framework** using **Apache Atlas**, establishing clear data ownership and compliance protocols. This initiative achieved a **12% reduction in data management costs** and a **15% decrease in compliance errors**, enhancing data accuracy and regulatory alignment.

Goldman Sachs Early Career Accelerator

Remote, Online

Finance Analyst Intern

July 2022 to March 2023

- Completed an 8-month virtual finance program with over 20 projects and case studies, ranking in the top 10% for performance in investment banking, private equity, and financial technology.
- Built a network of over 50 professionals, gained insights into Goldman Sachs' corporate structure, improved operational knowledge by 30%, and developed recommendations to enhance cross-divisional collaboration.

PROJECTS AND LEADERSHIP

Algorithmic Trading System | Python, Vantage API, Black- Scholes Model

July 2024 - September 2024

- Built a real-time algorithmic trading system using Python, incorporating the Black-Scholes model for option pricing and integrating live market data through the Alpha Vantage API to automate trading decisions. This system improved trading accuracy by 15% and increased user efficiency, significantly optimizing the trading process with a custom graphical user interface (GUI).

AIcedemy | Swift, Machine Learning (CNNs, PyTorch, Swift), AWS, MongoDB

May 2024 - August 2024

- Developed an educational app using Swift that integrates convolutional neural networks (CNNs) to analyze student-submitted photos and generate personalized, interactive simulations and questions. This approach enhanced student engagement and understanding of complex subjects, resulting in over 1,000 downloads in the first month and a 40% increase in user engagement.

Skills

Programming Languages: Python (TensorFlow, Scikit-learn, Keras, PyTorch, Seaborn), R, Java, C/C++, Swift, SQL.

Tools & Frameworks: Git (CI/CD), Power BI, Tableau, Apache Atlas, Excel, Vantage API, Microsoft Outlook.

Data Engineering & Big Data: MongoDB, NoSQL, AWS (S3, EC2), Google Cloud.
